Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Residential Subdivision		
Project Location (describe, and attach a general location map): 1789 Dodge Road - Town of Amherst - Erie County		
Brief Description of Proposed Action (include purpose or need): The proposed project ("action") consists of a rezoning of approximately 6.7 acres of land at 1789 Dodge Road ("Project Site") from Suburban Agriculture ("S-A") to Residential District Three ("R-3") to accommodate a proposed 18 lot residential subdivision (15 homes) along with all related site improvements. A copy of the Sketch Plan [Drawing C-100 - Date: 07/14/21] depicting the layout of the proposed residential subdivision as prepared by Carmina Wood Morris DPC is attached to the Amended Rezoning Application. The frontage of the Project Site will consist of Permanent Open Space. The proposed action has been defined broadly to include all required discretionary approvals and permits as well as all proposed site improvements including proposed detached single family homes, a public roadway, a roadway connection onto Dodge Road, driveways, lighting, an on-site storm water management system, and all required utility improvements. The project purpose is to develop the Project Site for Single-Family Residential Use per the recommended land use in Figure 6 of the Town's adopted Comprehensive Plan. The Project Sponsor believes the project will not result in any potentially significant adverse environmental impacts and that the issuance of a negative declaration by the designated lead agency [anticipated to be the Amherst Town Board] is both appropriate and justified.

Dear Joe Rubino:

**Wetland CC-15
Boundary Delineation
1789 Dodge Road
Town of Amherst, Erie County**

This letter serves as notification that I completed an office review of your property at 1789 Dodge Road, parcel #42.00-1-45.2, to determine whether wetlands present within and adjacent to the parcel meet New York State Department of Environmental Conservation (NYSDEC) criteria for state wetlands jurisdiction.

Based on our review, we verified the boundary, delineated by Earth Dimensions, Inc. (EDI), of Wetland CC-15, denoted as "Wetland 1" by EDI. The wetland boundary is identified with pink plastic flagging consecutively numbered from W1-1 through W1-7 and extends generally south to north across the eastern property boundary, as depicted in Figure 6 in EDI's December 2020 Wetland and Waterbodies Delineation Report.

In 1975, the New York State Legislature passed the Freshwater Wetlands Act to preserve and protect wetlands and their functions, such as flood protection and fish and wildlife habitat. Activities that may have a negative impact on the wetlands and their functions, such as construction, filling, draining, clearing vegetation, or polluting, are regulated. Landowners must first obtain permits in order to ensure that no problems result from their proposed activities in the wetland or the regulated 100-foot adjacent area. Contact our Division of Environmental Permits Office for information regarding permit requirements at:

Locations of wetland flags were recorded with a hand-held Global Positioning System and, therefore, may not be survey-accurate. For precise locations of the boundaries, have the flags surveyed relative to the property boundary. Note that wetland boundaries may change over time and this map does not fix the wetland boundary indefinitely.

If you would like to document the precise boundary of the wetland relative to your property boundary, it is your responsibility to have the wetland boundary surveyed. If you choose to complete a survey, the wetland boundary survey map should be submitted to me for verification. A copy of this Department's Requirements for Wetland Survey and Mapping is enclosed. Please note that a surveyed wetland boundary that has been verified by this Department will be considered valid for **five** years.

Please note that, for the purpose of an Article 24 application, this Department will not require a surveyed wetland boundary map. Instead, you may submit a sketch of the planned work areas on the wetland delineation map and indicate distances between the work areas and the wetland boundary using on-the-ground measurements.

Be advised that the U.S. Army Corps of Engineers may also have wetland jurisdiction irrespective of the Department of Environmental Conservation. For more information, you may contact the Corps at:

United States Army Corps of Engineers Regulatory Branch
1776 Niagara Street
Buffalo, New York 14207
Telephone: (716) 879-4330

If you have any questions about this wetland delineation, please feel free to call me in the Buffalo office at (716) 851-7010.

6. Project Description: Provide the following information about your project. Continue each response and provide any additional information on other pages. **Attach plans on separate pages.**

a. Purpose of the proposed project:
 The proposed project involves the construction of a 17-lot residential subdivision on a 6.7 acre mostly vacant land parcel.

b. Description of current site conditions:
 The project area is mostly mown lawn with scattered trees. An existing single family home and outbuilding are located near the Dodge Road frontage.

c. Proposed site changes:
 The project will involve the construction a 17-lot residential subdivision with associated infrastructure. The project will require the impact to 6,025 square feet (0.14 acre) of state regulated 100-foot upland adjacent area to FWW CC-15. The proposed impact area is within an existing mown lawn area.

d. Type of structures and fill materials to be installed, and quantity of materials to be used (e.g., square feet of coverage, cubic yards of fill material, structures below ordinary/mean high water, etc.):
 No impacts are proposed to any regulated streams.

e. Area of excavation or dredging, volume of material to be removed, location of dredged material placement:
 The project does not involve dredging. The site will be graded, with all graded material remaining on site.

f. Is tree cutting or clearing proposed? Yes If Yes, explain below. No
 Timing of the proposed cutting or clearing (month/year): Unknown
 Number of trees to be cut: _____ Acreage of trees to be cleared: 6.7 acres

g. Work methods and type of equipment to be used:

Standard construction practices and equipment, including excavators and bull dozers will be utilized during the construction of the project.

h. Describe the planned sequence of activities:

Pollution control (silt fence, silt sock, etc.) will be installed prior to site disturbance. The site will then be cleared and stripped and the stormwater facilities will be installed. Upon completion of initial grading, roads and utilities will be installed followed by construction of the residential structures. Upon completion, the site will be finished graded and stabilized.

i. Pollution control methods and other actions proposed to mitigate environmental impacts:

Standard Blue Book SWPPP measures will be used to prevent sediment from entering waterways or wetlands during construction.

j. Erosion and silt control methods that will be used to prevent water quality impacts:

Silt fence or silt sock will be placed along the approved limits of disturbance. Immediately after final grading, seeding and mulching will take place.

k. Alternatives considered to avoid regulated areas. If no feasible alternatives exist, explain how the project will minimize impacts:

The project has been designed to minimize impacts to the upland adjacent area. The 0.14 acre of upland adjacent area impact is associated with grading requirements for Lot 9 and the proposed road terminus.

l. Proposed use: Private Public Commercial

m. Proposed Start Date: Summer 2022 Estimated Completion Date: Summer 2023

n. Has work begun on project? Yes If Yes, explain below. No
